

Alzheimer's and Dementia Course Description

This course is designed to teach you some basic principles as it applies to understanding and working with patients or loved ones with dementia of the Alzheimer's type.

Join us as we explore life through the eyes of persons with Alzheimer's and identify strategies that can assist us to better deliver care in a more empathetic and compassionate fashion.

COURSE OVERVIEW

We will Define and Discuss Alzheimer's Disease (AD) and Dementia

- Describe the journey through the eyes of a person with AD
- Explain difference between dementia delirium and depression
- Describe signs, symptoms, and behaviors associated with AD
- Explain the care given to persons with AD
- Describe the effects on the family
- Describe validation therapy

At the end of the course all individuals who attend all time allotted for course will receive total contact hours offered for course after the course evaluation is completed and returned via email.

A completion certificate will be provided.

Total Contact Hours **4**
